NO. 5412 P. 3/6

Appl. No. 09/918,844  
Amtd. Dated June 15, 2004  
Reply to Office action of June 3, 2004

**Claim Amendments**

**1-19. (Cancelled)**

**20. (Currently amended) A polytetrafluoroethylene (PTFE) material comprising:**

aggregations of nodes;

short fibrils multidirectionally interconnecting the nodes in the aggregations to form expanded aggregations; and

long fibrils interconnecting the aggregations.

**21. (Original) The material of claim 20 wherein the long fibrils have average lengths of about 100 to 1000 microns.**

**22. (Original) The material of claim 20 wherein the long fibrils have average lengths of about 500 to 1000 microns.**

**23. (Original) The material of claim 20 wherein the short fibrils have average lengths of about 10 to 30 microns.**

**24. (Original) The composite article as recited in claim 20, wherein the aggregations have densities of less than about 2.0 grams per cubic centimeter.**

**25. (Original) The composite article as recited in claim 20, wherein the nodes have densities of about 2.0 to 2.2 grams per cubic centimeter.**

26. (Currently amended) A polytetrafluoroethylene (PTFE) material comprising:

expanded aggregations of nodes, the nodes being multidirectionally interconnected by fibrils having average lengths of about 10 to 30 microns;

long fibrils having average lengths of about 500 to 1000 microns interconnecting the aggregations;

the aggregations having densities of less than about 2.0 grams per cubic centimeter; and

the nodes having average densities of about 2.0 to 2.2 grams per cubic centimeter.
